

PHOTORAMA 2024

One-day event featuring educational seminars, special savings offered from Unique Photo and Tamron, and discussion with professional landscape photographers, Alyce Bender & Ken Hubbard.

TRAVELING NEAR OR FAR:

Take a trip with Tamron's Ken Hubbard! A great travel and photography adventure starts far before you set foot on the plane or behind the wheel of a car. Ken will discuss all of the stages of planning your next great travel experience. Start with research and planning, move onto what gear to pack, and then finish with creating the images that tell stories that last a lifetime. This will be a great guide to help you further your travel experience through amazing photographs.

KEN HUBBARD

Ken Hubbard is the Field Services Manager and instructor for Tamron who has had nationwide gallery showings of his portraits and landscape photography. His consistent output of breathtaking photographs continually challenges the boundaries of the genre.

SEVEN PRINCIPLES OF WILDLIFE PHOTOGRAPHY:

There are certain principles that, when implemented, create wildlife images that visually engage a viewer. In this session we will look at these seven key aspects of wildlife photography, defining them and discussing how to achieve them, to include elements such as planning, composition, and light. By understanding the seven principles and how they relate to each other, you can further your photography skills in the field and create portfolio-worthy images.

ALYCE BENDER

Alyce Bender is a nature photographer, writer, educator, and adventurer. Camera in hand since childhood, her fascination for photography developed into a career after serving in the U.S. Air Force. Her passion for wildlife and the natural environment compels her to connect others with nature through sharing both visual art and in-field experiences that promote conservation, creativity, and ethical photography.
